Title: A Primer on Graphs and Groups: I

Date: Thursday, April 20, 2006

Time: 3:30 p.m.

Place: Math & Stats Lounge (CW 307.20)

Abstract

There has been considerable interaction between groups and graphs. Some of the interaction has arisen because many applications of graphs require them to have a lot of symmetry. Other interaction arose out of questions dealing with the automorphism groups of graphs. I am going to present a survey exploring several threads in the area of graphs and groups.
